Subject index

A

Abutments, overdenture, effect of 0.4% stannous fluoride gel on gingival health of (Derkson and MacEntee), 23
Acid-etched fixed partial dentures, effect of retainer design on retention of filled resin in (Williams et al), 417
  phosphoric, as etching agent, optimal concentration of. Part I: Tensile bond strength studies (Gottlieb et al), 48
Acrylic resin copings, interocclusal registration at vertical dimension of occlusion using (Postol), 39
  provisional restorations, heat-processed: In-office procedure (Davidoff), 673
Acute and chronic patients with craniomandibular disorders, study of use of occlusion splints in treatment of (Okeson et al), 708
Adjustment(s) and postadjustment finishing techniques on surface of porcelain-bonded-to-metal crowns, evaluation of (Newitter et al), 388
  intraoral occlusal, minimizing (Halperin et al), 448
  occlusal, rational performance of (Riise), 319
Alloys, dental casting: Update on terminology (Goldfogel and Nielsen), 340
  low-gold fixed prosthodontic (Huget et al), 159
  noble metal, tarnish and corrosion of (Lang et al), 245
  some nonprecious, study of effect of increased mold temperature on casting ability of, for porcelain veneers (Thomson), 52
  various, post-ceramic soldering of (Sloan et al), 686
Aluminous porcelain jacket crowns constructed with conventional and twin foil technique, comparative study of strength of (Munoz et al), 271
American Board of Prosthodontics (Wendt), 740
Anatomic undercuts, hollow polydimethylsiloxane facial prostheses using (Taicher et al), 444
Anterior guide table, customized, fabrication of (Hoyle), 490
  teeth, maxillary, and maxillary central incisor, clinical evaluation of techniques to determine combined width of (Scandrett et al), 15
Antimicrobial action of polycarboxylate cement, enhancement of (Schwartzman and Caputo), 171
Arbitrary hinge axis, geometry of, as it relates to occlusion (Zuckerman), 725
Articulator, semiadjustable, modification of, to accept patient's intercondylar width (Kafandaris and Theodorou), 385
Atrophic mandible, mandibular orthopedic bone staple in treatment of (O'Malley and Gordon), 432
Attachment, Micro-Ring semiprecision, for mandibular staple bone implant prostheses (Tarlow and Rissin), 695
Axis(es), arbitrary hinge, geometry of, as it relates to occlusion (Zuckerman), 725
  hinge, translation from retruded contact position to intercuspal position in dentulous subjects in treatment (Rosner), 713
  rotational, of semiprecision and precision distal-extension removable partial dentures, analysis of (McLeod), 130

July, 1-118; August, 119-232; September, 233-366; October, 367-502; November, 503-636; December, 637-772.

B

Banded, orthodontically, teeth, method to facilitate impressions of (Lorton) (Tips), 356
Base, record, utilizing impression as (Ortman and Edgerton), 618
Beveled and butt Class V preparations, surface topography of enamel margins of (Retief et al), 166
Bilateral coordination pattern of masticatory muscle activities during chewing in normal subjects (Mushimoto and Mitani), 191
Board of Prosthodontics, American (Wendt), 740
Body and opaque porcelain, optimum thicknesses of (Barghi and Lorenzana), 429
Bond strength, apparent, of porcelain-metal couples, effect of cooling rate on (Guinn et al), 551
  of ceramometal systems, approach to determining (Schaffer), 282
  two ceramometal systems, comparison of (Gavelis et al), 424
  studies, tensile, Part I: Optimal concentration of phosphoric acid as etching agent (Gottlieb et al), 48
Bone implant prostheses, mandibular staple, Micro-Ring semiprecision attachment for (Tarlow and Rissin), 695
  staple, mandibular orthopedic, in treatment of atrophic mandible (O'Malley and Gordon), 432
Border movements, mandibular, factors influencing pantographic tracings of (Mongini and Capurso), 585
Boxing impressions, quick technique for (MacPherson and Javid) (Tips), 220
Broken occlusal rest, replacement technique for (Kazanoglu and Smith), 621
Buildups, cast and composite resin, simplification of (Rzepka and Abrams), 544
Butt and beveled Class V preparations, surface topography of enamel margins of (Retief et al), 166

C

Canine protection or group function (Jemt et al), 719
Caries, periodontal and prosthetic findings in patients with removable partial dentures: Ten-year longitudinal study (Bergman et al), 506
Cast(s) and composite resin buildups, simplification of (Rzepka and Abrams), 544
  crown, preexisting, restoration of tooth to accommodate (Brady), 268
  -gold core and post construction for multirooted teeth (Kitzis and Pascoe), 156
  endodontic posts, photoelastic stress analysis of (Mattison), 407
  restorations, small, use of radiographs in (Mattingly et al), 44
  gypsum, repair of (Sanad et al), 492
  remount, for removable partial dentures (Fiebiger et al), 106
  restoration(s), evaluation of frozen-slab technique for cementing (Palermo et al), 555
  full, design offering superior marginal characteristics (Pardo), 539
Casting(s) ability of some nonprecious alloys for porcelain veneers, study of effect of increased mold temperature on (Thomson), 52
  alloys, dental: Update on terminology (Goldfogel and Nielsen), 340
  retention of, with glass ionomer cement (McComb), 285
  technique for seating (Arakelian) (Tips), 357
Cement, effects of, on crown retention (Worley et al), 289
  glass ionomer, retention of castings with (McComb), 285
  polycarboxylate, enhancement of antimicrobial action of (Schwartzman and Caputo), 171
Cementing cast restorations, evaluation of frozen-slab technique for (Palermo et al), 555
  medium, retention of dowels using composite resin as (Assif and Ferber), 292
Central incisor, maxillary, and maxillary anterior teeth, clinical evaluation of techniques to determine combined width of (Scandrett et al), 15
Ceramic-post soldering of various alloys (Sloan et al), 686
Ceramometal systems, approach to determining bond strength of (Schaffer), 282
  two, comparison of bond strength of (Gavelis et al), 424
Cervical-orofacial movement disorders, severe involuntary, etiology and dental treatment of (Sutcher and Sugar), 703
Chew-in technique, Hardy: Modified procedure (McDermott and Roewe), 202
Chewing and swallowing, positions of mandible during, recorded by light-emitting diodes (Jemt), 206
  bilateral coordination pattern of masticatory muscle activities during, in normal subjects (Mushimoto and Mitani), 191
Chip fractures, Part II: Conventional and microfilled composite resins (Lambrechts et al), 527
Chromascan designations, conversion of, to CIE tristimulus values (Bangtson and Goodkind), 610
Chronic and acute patients with craniomandibular disorders, study of use of occlusion splints in treatment of (Okeson et al), 708
CIE tristimulus values, conversion of Chromascan designations to (Bangtson and Goodkind), 610
Circulation and respiration in unanesthetized rats, effects of methyl methacrylate monomer vapors on (Blanchet et al), 344
Clasping system, subpontic, updated laboratory procedure for (Garver), 734
Class V preparations, butt and beveled, surface topography of enamel margins of (Retief et al), 166
Cleansing, denture-, agents, efficacy of (Ghalichebaf et al), 515
Cleft palate patients, prosthodontic management of (Abadi and Johnson), 297
Clenching, experimental tooth, delayed onset of masseter muscle pain in (Christensen et al), 579
Color modifiers, custom-made, and opacifiers for composite resins (Biederman) (Tips), 625
Communication, alienation, or confusion (Preston), 599
  discussion of (Adisman), 607
Complete crowns, margins of—Literature review (Gardner), 396
  dentures, functional contouring of palatal vault for improving speech with (Goyal and Greenstein), 640
Composite and microfilled resin, in vivo comparison of: Three-year report (Christensen and Christensen), 657
  resin(s) and cast buildups, simplification of (Rzepka and Abrams), 544
  as cementing medium, retention of dowels using (Assif and Ferber), 292
  clinical significance of polymerization shrinkage of (Bausch et al), 59
  conventional and microfilled. Part II: Chip fractures (Lambrechts et al), 527
  custom-made color modifiers and opacifiers for (Biederman) (Tips), 625
  material development and clinical performance of (Loeys et al), 664
Concentration, optimal, of phosphoric acid as etching agent. Part I: Tensile bond strength studies (Gottlieb et al), 48
Condylar path inclination, clinical study of graphic registration of (Preti et al), 461
Contact, nonworking tooth, influence of assisted mandibular movement on incidence of (Okeson et al), 174
  position, retruded, hinge axis translation from, to intercuspal position in dentulous subjects in treatment (Rosner), 713
Contour, physiologic, guide to: Die trimming (Tanquist), 485
Contouring, functional, of palatal vault for improving speech with complete dentures (Goyal and Greenstein), 640
Conventional and microfilled composite resins. Part II: Chip fractures (Lambrechts et al), 527

Conventional and—cont'd
twin foil technique, comparative study of strength of aluminous porcelain jacket crowns constructed with (Munoz et al), 271
processing techniques, surface topography of silicone rubber prosthetic materials fabricated using (Kent and Zeigel), 698
Cooling rate, effect of, on apparent bond strength of porcelain-metal couples (Guinn et al), 551
Coordination, bilateral, pattern of masticatory muscle activities during chewing in normal subjects (Mushimoto and Mitani), 191
Copings, acrylic resin, interocclusal registration at vertical dimension of occlusion using (Postol), 39
Core and post systems: Which one is best? (Miller), 27
cast-gold, and post construction for multirooted teeth (Kitzis and Pascoe), 156
-post foundations for endodontically treated posterior teeth (Chan and Bryant), 401
Corrosion and tarnish of noble metal alloys (Lang et al), 245
Cosmetic results in maxillofacial prosthetics, evaluating (Lowental and Sela), 567
Couples, porcelain-metal, effect of cooling rate on apparent bond strength of (Guinn et al), 551
Craniomandibular disorders, study of use of occlusion splints in treatment of acute and chronic patients with (Okeson et al), 708
Creep and stress relaxation of soft denture liners (Robinson and McCabe), 135
Crown(s), aluminous porcelain jacket, constructed with conventional and twin foil technique, comparative study of strength of (Munoz et al), 271
complete, margins of—Literature review (Gardner), 396
full, restorations and gingival inflammation in controlled population (Koth), 681
multiple, fabricated for existing removable partial denture (Jordan et al), 102
porcelain-bonded-to-metal, evaluation of adjustment and postadjustment finishing techniques on surface of (Newitter et al), 388
preexisting cast, restoration of tooth to accommodate (Brady), 268
retention, effects of cement on (Worley et al), 289
Curriculum, dental school, maxillofacial prosthetics in (Firtell and Curtis), 336
Custom impression tray, use of polydimethylsiloxane as (Taicher et al), 562
-made color modifiers and opacifiers for composite resins (Biederman) (Tips), 625
ocular prosthetics (Cain), 690
Customized anterior guide table, fabrication of (Hoyle), 490

D

Dam, rubber, utilizing, in making impressions (Stankewitz and Striano) (Tips), 358
Danger, potential, to maxillofacial prosthodontist—Xylene (Glassman), 571
Deformation, plastic, thickness, and strength of occlusal registration strips (Halperin et al), 575
Deformities, postsurgical soft tissue, associated with marginal mandibulectomy, prosthodontic management of. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
Dental casting alloys: Update on terminology (Goldfogel and Nielsen), 340
school curriculum, maxillofacial prosthetics in (Firtell and Curtis), 336
students, survey of removable prosthodontic clinical experience of (Herring and Stephens), 198
treatment and etiology of severe involuntary orofacial-cervical movement disorders (Sutcher and Sugar), 703
Dentistry, restorative, and periodontics, principles in: Forced eruption (Potashnick and Rosenberg), 141
Dentofacial morphology, diverse, evaluation of mandibular rest position in subjects with (Wessberg et al), 451
Dentulous subjects in treatment, hinge axis translation from retruded contact position to intercuspal position in (Rosner), 713
Denture(s), acid-etched fixed partial, effect of retainer design on retention of filled resin in (Williams et al), 417
-cleansing agents, efficacy of (Ghalichebaf et al), 515
complete, functional contouring of palatal vault for improving speech with (Goyal and Greenstein), 640
design, removable partial, for mandibular resection patient (Firtell and Curtis), 437
instructional aid for teaching (Williams and Hartman) (Tips), 222
rotational path removable partial (Jacobson and Krol), 370
existing removable partial, multiple crowns fabricated for (Jordan et al), 102
fixed-removable partial (Mueninghoff and Johnson), 547 (Rhoads), 122
flasking: Comparative study of three techniques (Oliva and Lowe), 736
identification, "invisible": Forensic aid (Davis) (Tips), 221
liners, soft, creep and stress relaxation of (Robinson and McCabe), 135
plaque: Quiet destroyer (Tarbet), 647
removable partial, caries, periodontal and prosthetic findings in patients with: Ten-year longitudinal study (Bergman et al), 506
evaluation of prefabricated lingual rest seats for (Wong et al), 521
five-year survey of treatment with. Part I (Kratochvil et al), 237
remount casts for (Fiebiger et al), 106
semiprecision and precision distal-extension removable partial, analysis of rotational axes of (McLeod), 130
Desensitization procedure, soft palate, for patients requiring palatal lift prostheses (Daniel), 565
Design, full cast restoration, offering superior marginal characteristics (Pardo), 539
removable partial denture, for mandibular resection patient (Firtell and Curtis), 437
instructional aid for teaching (Williams and Hartman) (Tips), 222
retainer, effect of, on retention of filled resin in acid-etched fixed partial dentures (Williams et al), 417
rotational path removable partial denture (Jacobson and Krol), 370
Development, material, and clinical performance of composite resins (Loeys et al), 664
Diagnosis, TMJ, pitfalls of muscle palpation in (Friedman and Weisberg), 331
Diagnostic concept, endodontic-restorative: Stressed pulp condition (Abou-Rass), 264
Die(s), accurate removable, producing, from elastic full arch impressions (Tanquist et al), 210
systems, four removable, relative accuracy of (Myers and Hembree), 163
trimming: Guide to physiologic contour (Tanquist), 485
Diodes, light-emitting, positions of mandible during chewing and swallowing recorded by (Jemt), 206
Diseases, noninfectious granulomatous, requiring maxillofacial prosthodontic management (Munson et al), 309
Disorders, craniomandibular, study of use of occlusion splints in treatment of acute and chronic patients with (Okeson et al), 708
severe involuntary orofacial-cervical movement, etiology and dental treatment of (Sutcher and Sugar), 703
Distal-extension removable partial dentures, semiprecision and precision, analysis of rotational axes of (McLeod), 130

Diverse dentofacial morphology, evaluation of mandibular rest position in subjects with (Wessberg et al), 451
Dowels, retention of, using composite resin as cementing medium (Assif and Ferber), 292
Dysfunction, mandibular, epidemiologic studies of: Critical review (Greene and Marbach), 184

E

Edentulous mandible, positioning device for, in extraoral radiography (Steen), 257
patient, beneficial effects of tissue massage for (Tautin), 653
vestibuloplasty using palatal graft technique (Amphlett and Colwell), 8
Elastic full arch impressions, producing accurate removable dies from (Tanquist et al), 210
Electric waxing instrument, improved, use of (Lundeen and Welsch), 352
Electrode pair, single-unit surface, for use in electromyography (Yamaga et al) (Tips), 626
Electromyography, single-unit surface electrode pair for use in (Yamaga et al) (Tips), 626
Enamel margins of butt and beveled Class V preparations, surface topography of (Retief et al), 166
Endodontic posts, cast-gold, photoelastic stress analysis of (Mattison), 407
-restorative diagnostic concept: Stressed pulp condition (Abou-Rass), 264
Endodontically treated posterior teeth, post-core foundations for (Chan and Bryant), 401
Equilibrium point of mandible, physiologic, determination of, by electronic means (Tradowsky and Dworkin), 89
Eruption, forced: Principles in periodontics and restorative dentistry (Potashnick and Rosenberg), 141
Esthetic considerations in use of face-bows (Stade et al), 253
Etched, acid-, fixed partial dentures, effect of retainer design on retention of filled resin in (Williams et al), 417
Etching agent, optimal concentration of phosphoric acid as. Part I: Tensile bond strength studies (Gottlieb et al), 48
Extraoral radiography, positioning device for edentulous mandible in (Steen), 257

F

Face-bows, esthetic considerations in use of (Lang et al), 253
Facial prostheses, hollow polydimethylsiloxane, using anatomic undercuts (Taicher et al), 444
use of medical-grade methyl triacetoxy crosslinked silicone for (Udagama and Drane), 86
Filled resin in acid-etched fixed partial dentures, effect of retainer design on retention of (Williams et al), 417
Finishing techniques, adjustment and postadjustment, on surface of porcelain-bonded-to-metal crowns, evaluation of (Newitter et al), 388
Fixed partial dentures, acid-etched, effect of retainer design on retention of filled resin in (Williams et al), 417
prosthodontic alloys, low-gold (Huget et al), 159
-removable partial denture (Mueninghoff and Johnson), 547 (Rhoads), 122
Flaps, surgical, Part II: Prosthodontic management of postsurgical soft tissue deformities associated with marginal mandibulectomy (Shifman and Lepley), 303
Flasking, denture: Comparative study of three techniques (Oliva and Lowe), 736
Forced eruption: Principles in periodontics and restorative dentistry (Potashnick and Rosenberg), 141
Foundation(s) material, restorative resin (Brady and Reisbick), 676
post-core, for endodontically treated posterior teeth (Chan and Bryant), 401
Fractures, chip, Part II: Conventional and microfilled composite resins (Lambrechts et al), 527
Frozen-slab technique, evaluation of, for cementing cast restorations (Palermo et al), 555
Full arch impressions, elastic, producing accurate removable dies from (Tanquist et al), 210
cast restoration design offering superior marginal characteristics (Pardo), 539
crown restorations and gingival inflammation in controlled population (Koth), 681
Function, group, or canine protection (Jemt et al), 719
Furcally involved teeth, preparation of (Ward), 261

G

Gel, 0.4% stannous fluoride, effect of, on gingival health of overdenture abutments (Derkson and MacEntee), 23
Geometry of arbitrary hinge axis as it relates to occlusion (Zuckerman), 725
Gingival health of overdenture abutments, effect of 0.4% stannous fluoride gel on (Derkson and MacEntee), 23
inflammation and full crown restorations in controlled population (Koth), 681
Glass ionomer cement, retention of castings with (McComb), 285
Glossectomy patients, prosthodontic rehabilitation for (Aramany et al), 78
Gold, cast-, core and post construction for multirooted teeth (Kitzis and Pascoe), 156
endodontic posts, photoelastic stress analysis of (Mattison), 407
low-, fixed prosthodontic alloys (Huget et al), 159
restorations, small cast-, use of radiographs in (Mattingly et al), 44
Graft technique, palatal, edentulous vestibuloplasty using (Amphlett and Colwell), 8
Granulomatous diseases, noninfectious, requiring maxillofacial prosthodontic management (Munson et al), 309
Graphic registration of condylar path inclination, clinical study of (Preti et al), 461
Group function or canine protection (Jemt et al), 719
Guide table, customized anterior, fabrication of (Hoyle), 490
Gypsum casts, repair of (Sanad et al), 492

H

Hardy chew-in technique: Modified procedure (McDermott and Roewe), 202
Heat-processed acrylic resin provisional restorations: In-office procedure (Davidoff), 673
Hinge axis, arbitrary, geometry of, as it relates to occlusion (Zuckerman), 725
translation from retruded contact position to intercuspal position in dentulous subjects in treatment (Rosner), 713
Hollow polydimethylsiloxane facial prostheses using anatomic undercuts (Taicher et al), 444
Hydrocolloid, irreversible: Clean, simple mixing technique (Kwong and Chen) (Tips), 624

I

Identification, denture, "invisible": Forensic aid (Davis) (Tips), 221
Implant(s) prostheses, mandibular staple bone, Micro-Ring semiprecision attachment for (Tarlow and Rissin), 695
unilateral subperiosteal: Clinical technique evolving from experimental studies (Flynn et al), 82
in primates (Natiella et al), 68
Impression(s), elastic full arch, producing accurate removable dies from (Tanquist et al), 210
of orthodontically banded teeth, method to facilitate (Lorton) (Tips), 356
quick technique for boxing (MacPherson and Javid) (Tips), 220
tray, custom, use of polydimethylsiloxane as (Taicher et al), 562
utilizing, as record base (Ortman and Edgerton), 618
rubber dam in making (Stankewitz and Striano) (Tips), 358

Incisor, maxillary central, and maxillary anterior teeth, clinical evaluation of techniques to determine combined width of (Scandrett et al), 15
Inclination, condylar path, clinical study of graphic registration of (Preti et al), 461
Inflammation, gingival, and full crown restorations in controlled population (Koth), 681
In-office procedure: Heat-processed acrylic resin provisional restorations (Davidoff), 673
Intercondylar width, patient's, modification of semiadjustable articulator to accept (Kafandaris and Theodorou), 385
Intercuspal position, hinge axis translation from retruded contact position to, in dentulous subjects in treatment (Rosner), 713
Interocclusal registration at vertical dimension of occlusion using acrylic resin copings (Postol), 39
Intraoral occlusal adjustments, minimizing (Halperin et al), 448
In vivo comparison of microfilled and composite resin: Three-year report (Christensen and Christensen), 657
Involuntary orofacial-cervical movement disorders, severe, etiology and dental treatment of (Sutcher and Sugar), 703
Irreversible hydrocolloid: Clean, simple mixing technique (Kwong and Chen) (Tips), 624

J

Jacket crowns, aluminous porcelain, constructed with conventional and twin foil technique, comparative study of strength of (Munoz et al), 271

L

Laboratory procedure, updated, for subpontic clasping system (Garver), 734
Life changes, recent, and myofascial pain syndrome (Moody et al), 328
Lift prostheses, palatal, soft palate desensitization procedure for patients requiring (Daniel), 565
Light-emitting diodes, positions of mandible during chewing and swallowing recorded by (Jemt), 206
Liners, soft denture, creep and stress relaxation of (Robinson and McCabe), 135
Lingual rest seats, prefabricated, for removable partial dentures, evaluation of (Wong et al), 521
Low-gold fixed prosthodontic alloys (Huget et al), 159

M

Mandible, atrophic, mandibular orthopedic bone staple in treatment of (O'Malley and Gordon), 432
determination of physiologic equilibrium point of, by electronic means (Tradowsky and Dworkin), 89
edentulous, positioning device for, in extraoral radiography (Steen), 257
positions of, during chewing and swallowing recorded by light-emitting diodes (Jemt), 206
Mandibular border movements, factors influencing pantographic tracings of (Mongini and Capurso), 585
dysfunction, epidemiologic studies of: Critical review (Greene and Marbach), 184
movement, assisted, influence of, on incidence of nonworking tooth contact (Okeson et al), 174
orthopedic bone staple in treatment of atrophic mandible (O'Malley and Gordon), 432
resection patient, removable partial denture design for (Firtell and Curtis), 437
rest position in subjects with diverse dentofacial morphology, evaluation of (Wessberg et al), 451
stabilization prosthesis (Hartman and Swepston), 215
staple bone implant prostheses, Micro-Ring semiprecision attachment for (Tarlow and Rissin), 695
Mandibulectomy, marginal, prosthodontic management of postsurgical soft tissue deformities associated with. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
Marginal characteristics, superior, full cast restoration offering (Pardo), 539
mandibulectomy, prosthodontic management of postsurgical soft tissue deformities associated with. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
Margins, enamel, of butt and beveled Class V preparations, surface topography of (Retief et al), 166
of complete crowns—Literature review (Gardner), 396
Massage, tissue, beneficial effects of, for edentulous patient (Tautin), 653
Masseter muscle pain, delayed onset of, in experimental tooth clenching (Christensen et al), 579
Masticatory muscle activities during chewing in normal subjects, bilateral coordination pattern of (Mushimoto and Mitani), 191
Maxillary anterior teeth and maxillary central incisor, clinical evaluation of techniques to determine combined width of (Scandrett et al), 15
central incisor and maxillary anterior teeth, clinical evaluation of techniques to determine combined width of (Scandrett et al), 15
Maxillofacial prosthetics, evaluating cosmetic results in (Lowental and Sela), 567
in dental school curriculum (Firtell and Curtis), 336
prosthodontic management, noninfectious granulomatous diseases requiring (Munson et al), 309
prosthodontist, potential danger to—Xylene (Glassman), 571
Metal alloys, noble, tarnish and corrosion of (Lang et al), 245
-bonded-to-porcelain crowns, evaluation of adjustment and post-adjustment finishing techniques on surface of (Newitter et al), 388
-porcelain couples, effect of cooling rate on apparent bond strength of (Guinn et al), 551
Methyl methacrylate monomer vapors, effects of, on respiration and circulation in unanesthetized rats (Blanchet et al), 344
triacetoxy silane crosslinked silicone, medical-grade, use of, for facial prostheses (Udagama and Drane), 86
Microfilled and composite resin, in vivo comparison of: Three-year report (Christensen and Christensen), 657
conventional composite resins. Part II: Chip fractures (Lambrechts et al), 527
Micro-Ring semiprecision attachment for mandibular staple bone implant prostheses (Tarlow and Rissin), 695
Mixing technique, clean, simple: Irreversible hydrocolloid (Kwong and Chen) (Tips), 624
Modifiers, custom-made color, and opacifiers for composite resins (Biederman) (Tips), 625
Mold temperature, increased, study of effect of, on casting ability of some nonprecious alloys for porcelain veneers (Thomson), 52
Morphology, diverse dentofacial, evaluation of mandibular rest position in subjects with (Wessberg et al), 451
Movement(s), assisted mandibular, influence of, on incidence of nonworking tooth contact (Okeson et al), 174
disorders, severe involuntary orofacial-cervical, etiology and dental treatment of (Sutcher and Sugar), 703
mandibular border, factors influencing pantographic tracings of (Mongini and Capurso), 585
Multirooted teeth, cast-gold core and post construction for (Kitzis and Pascoe), 156
Muscle activities, masticatory, during chewing in normal subjects, bilateral coordination pattern of (Mushimoto and Mitani), 191
masseter, pain, delayed onset of, in experimental tooth clenching (Christensen et al), 579
palpation in TMJ diagnosis, pitfalls of (Friedman and Weisberg), 331
Myofascial pain syndrome and recent life changes (Moody et al), 328

N

Nickel problem (Blanco-Dalmau), 99
Noble metal alloys, tarnish and corrosion of (Lang et al), 245
Noninfectious granulomatous diseases requiring maxillofacial prosthodontic management (Munson et al), 309
Nonprecious alloys, some, study of effect of increased mold temperature on casting ability of, for porcelain veneers (Thomson), 52
Nonworking tooth contact, influence of assisted mandibular movement on incidence of (Okeson et al), 174

O

Occlusal adjustment(s), intraoral, minimizing (Halperin et al), 448
rational performance of (Riise), 319
registration strips, thickness, strength, and plastic deformation of (Halperin et al), 575
rest, broken, replacement technique for (Kazanoglu and Smith), 621
Occlusion, geometry of arbitrary hinge axis as it relates to (Zuckerman), 725
interocclusal registration at vertical dimension of, using acrylic resin copings (Postol), 39
splints in treatment of acute and chronic patients with craniomandibular disorders, study of use of (Okeson et al), 708
Ocular prosthetics, custom (Cain), 690
Office, in-, procedure: Heat-processed acrylic resin provisional restorations (Davidoff), 673
Opacifiers and custom-made color modifiers for composite resins (Biederman) (Tips), 625
Opaque and body porcelain, optimum thicknesses of (Barghi and Lorenzana), 429
Orbital prosthesis, new, use of previously completed prosthesis in construction of (Kent and Schaaf), 313
Orofacial-cervical movement disorders, severe involuntary, etiology and dental treatment of (Sutcher and Sugar), 703
Orthodontically banded teeth, method to facilitate impressions of (Lorton) (Tips), 356
Orthopedic bone staple, mandibular, in treatment of atrophic mandible (O'Malley and Gordon), 432
Osteoporosis: Some aspects of pathophysiology and therapy (Chesnut and Kribbs), 4
Overdenture abutments, effect of 0.4% stannous fluoride gel on gingival health of (Derkson and MacEntee), 23
sequelae: Nine-month report (Renner et al), 377

P

Pain, masseter muscle, delayed onset of, in experimental tooth clenching (Christensen et al), 579
Palatal graft technique, edentulous vestibuloplasty using (Amphlett and Colwell), 8
lift prostheses, soft palate desensitization procedure for patients requiring (Daniel), 565
vault, functional contouring of, for improving speech with complete dentures (Goyal and Greenstein), 640
Palate, cleft, patients, prosthodontic management of (Abadi and Johnson), 297
soft, desensitization procedure for patients requiring palatal lift prostheses (Daniel), 565
Palpation, muscle, in TMJ diagnosis, pitfalls of (Friedman and Weisberg), 331
Pantographic tracings of mandibular border movements, factors influencing (Mongini and Capurso), 585
Pantomograph, structure of TMJ as viewed on (Chomenko), 332
Parallel tube provisional splint technique (Lenchner), 412
Path, condylar, inclination, clinical study of graphic registration of (Preti et al), 461
rotational, removable partial denture design (Jacobson and Krol), 370
Patient(s), acute and chronic, with craniomandibular disorders, study of use of occlusion splints in treatment of (Okeson et al), 708
Patient(s)—cont'd
cleft palate, prosthodontic management of (Abadi and Johnson), 297
edentulous, beneficial effects of tissue massage for (Tautin), 653
glossectomy, prosthodontic rehabilitation for (Aramany et al), 78
mandibular resection, removable partial denture design for (Firtell and Curtis), 437
requiring palatal lift prostheses, soft palate desensitization procedure for (Daniel), 565
with removable partial dentures, caries, periodontal and prosthetic findings in: Ten-year longitudinal study (Bergman et al), 506
Performance, clinical, and material development of composite resins (Loeys et al), 664
Periodontal and prosthetic findings in patients with removable partial dentures, caries: Ten-year longitudinal study (Bergman et al), 506
Periodontics and restorative dentistry, principles in: Forced eruption (Potashnick and Rosenberg), 141
Phosphoric acid as etching agent, optimal concentration of. Part I: Tensile bond strength studies (Gottlieb et al), 48
Photoelastic stress analysis of cast-gold endodontic posts (Mattison), 407
Physiologic contour, guide to: Die trimming (Tanquist), 485
Plaque, denture: Quiet destroyer (Tarbet), 647
Plastic deformation, thickness, and strength of occlusal registration strips (Halperin et al), 575
Polycarboxylate cement, enhancement of antimicrobial action of (Schwartzman and Caputo), 171
Polydimethylsiloxane facial prostheses, hollow, using anatomic undercuts (Taicher et al), 444
uses of, as custom impression tray (Taicher et al), 562
Polymerization shrinkage of composite resins, clinical significance of (Bausch et al), 59
Porcelain-bonded-to-metal crowns, evaluation of adjustment and postadjustment finishing techniques on surface of (Newitter et al), 388
jacket crowns, aluminous, constructed with conventional and twin foil technique, comparative study of strength of (Munoz et al), 271
-metal couples, effect of cooling rate on apparent bond strength of (Guinn et al), 551
opaque and body, optimum thicknesses of (Barghi and Lorenzana), 429
repair, practical approach to (Barreto and Bottaro), 349
veneers, study of effect of increased mold temperature on casting ability of some nonprecious alloys for (Thomson), 52
Position(s), intercuspal, hinge axis translation from retruded contact position to, in dentulous subjects in treatment (Rosner), 713
mandibular rest, in subjects with diverse dentofacial morphology, evaluation of (Wessberg et al), 451
of mandible during chewing and swallowing recorded by light-emitting diodes (Jemt), 206
retruded contact, hinge axis translation from, to intercuspal position in dentulous subjects in treatment (Rosner), 713
Positioning device for edentulous mandible in extraoral radiography (Steen), 257
Post(s) and cast-gold core construction for multirooted teeth (Kitzis and Pascoe), 156
core systems: Which one is best? (Miller), 27
cast-gold endodontic, photoelastic stress analysis of (Mattison), 407
-ceramic soldering of various alloys (Sloan et al), 686
-core foundations for endodontically treated posterior teeth (Chan and Bryant), 410
Postadjustment and adjustment finishing techniques on surface of porcelain-bonded-to-metal crowns, evaluation of (Newitter et al), 388

Posterior tooth (teeth), endodontically treated, post-core foundations for (Chan and Bryant), 401
tilted. Part II: Biomechanical therapy (Becker et al), 149
Postsurgical soft tissue deformities associated with marginal mandibulectomy, prosthodontic management of. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
Precision and semiprecision distal-extension removable partial dentures, analysis of rotational axes of (McLeod), 130
Preexisting cast crown, restoration of tooth to accommodate (Brady), 268
Prefabricated lingual rest seats for removable partial dentures, evaluation of (Wong et al), 521
Primates, unilateral subperiosteal implants in (Natiella et al), 68
Processed, heat-, acrylic resin provisional restorations: In-office procedure (Davidoff), 673
Processing techniques, conventional, surface topography of silicone rubber prosthetic materials fabricated using (Kent and Zeigel), 698
Prosthesis(es), facial, use of medical-grade methyl triacetoxy cross-linked silicone for (Udagama and Drane), 86
hollow polydimethylsiloxane facial, using anatomic undercuts (Taicher et al), 444
mandibular stabilization (Hartman and Swepston), 215
staple bone implant, Micro-Ring semiprecision attachment for (Tarlow and Rissin), 695
new orbital, use of previously completed prosthesis in construction of (Kent and Schaaf), 313
palatal lift, soft palate desensitization procedure for patients requiring (Daniel), 565
previously completed, use of, in construction of new orbital prosthesis (Kent and Schaaf), 313
Prosthetic(s) and periodontal findings in patients with removable partial dentures, caries: Ten-year longitudinal study (Bergman et al), 506
custom ocular (Cain), 690
materials, silicone rubber, fabricated using conventional processing techniques, surface topography of (Kent and Zeigel), 698
maxillofacial, evaluating cosmetic results in (Lowental and Sela), 567
in dental school curriculum (Firtell and Curtis), 336
Prosthodontic(s) alloys, low-gold fixed (Huget et al), 159
American Board of (Wendt), 740
management, maxillofacial, noninfectious granulomatous diseases requiring (Munson et al), 309
of cleft palate patients (Abadi and Johnson), 297
postsurgical soft tissue deformities associated with marginal mandibulectomy. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
—1982, principles, concepts, and practices in (Academy of Denture Prosthetics), 467
rehabilitation for glossectomy patients (Aramany et al), 78
removable, clinical experience of dental students, survey of (Herring and Stephens), 198
Prosthodontist, maxillofacial, potential danger to—Xylene (Glassman), 571
Protection, canine, or group function (Jemt et al), 719
Provisional restorations, heat-processed acrylic resin: In-office procedure (Davidoff), 673
splint technique, parallel tube (Lenchner), 412
Pulp, stressed, condition: Endodontic-restorative diagnostic concept (Abou-Rass), 264

R

Radiographs, use of, in small cast-gold restorations (Mattingly et al), 44
Radiography, extraoral, positioning device for edentulous mandible in (Steen), 257
Rats, unanesthetized, effects of methyl methacrylate monomer vapors on respiration and circulation in (Blanchet et al), 344
Record base, utilizing impression as (Ortman and Edgerton), 618
Reducing teeth selectively, aid to (Mullick) (Tips), 494
Registration, graphic, of condylar path inclination, clinical study of (Preti et al), 461
interocclusal, at vertical dimension of occlusion using acrylic resin copings (Postol), 39
strips, occlusal, thickness, strength, and plastic deformation of (Halperin et al), 575
Rehabilitation, prosthodontic, for glossectomy patients (Aramany et al), 78
Relaxation, stress, and creep of soft denture liners (Robinson and McCabe), 135
Remount casts for removable partial dentures (Fiebiger et al), 106
Removable die(s), accurate, producing, from elastic full arch impressions (Tanquist et al), 210
systems, four, relative accuracy of (Myers and Hembree), 163
-fixed partial denture (Mueninghoff and Johnson), 547
partial denture(s), caries, periodontal and prosthetic findings in patients with: Ten-year longitudinal study (Bergman et al), 506
design for mandibular resection patient (Firtell and Curtis), 437
instructional aid for teaching (Williams and Hartman), 222
rotational path (Jacobson and Krol), 370
evaluation of prefabricated lingual rest seats for (Wong et al), 521
existing, multiple crowns fabricated for (Jordan et al), 102
five-year survey of treatment with. Part I (Kratochvil et al), 237
fixed- (Rhoads), 122
remount casts for (Fiebiger et al), 106
semiprecision and precision distal-extension, analysis of rotational axes of (McLeod), 130
prosthodontic clinical experience of dental students, survey of (Herring and Stephens), 198
Repair of gypsum casts (Sanad et al), 492
porcelain, practical approach to (Barreto and Bottaro), 349
Replacement technique for broken occlusal rest (Kazanoglu and Smith), 621
Resection patient, mandibular, removable partial denture design for (Firtell and Curtis), 437
Resin(s), acrylic, provisional restorations, heat-processed: In-office procedure (Davidoff), 673
composite, and cast buildups, simplification of (Rzepka and Abrams), 544
as cementing medium, retention of dowels using (Assif and Ferber), 292
clinical significance of polymerization shrinkage of (Bausch et al), 59
custom-made color modifiers and opacifiers for (Biederman) (Tips), 625
material development and clinical performance of (Loeys et al), 664
conventional and microfilled composite. Part II: Chip fractures (Lambrechts et al), 527
copings, acrylic, interocclusal registration at vertical dimension of occlusion using (Postol), 39
filled, in acid-etched fixed partial dentures, effect of retainer design on retention of (Williams et al), 417
foundation material, restorative (Brady and Reisbick), 676
microfilled and composite, in vivo comparison of: Three-year report (Christensen and Christensen), 657
Respiration and circulation in unanesthetized rats, effects of methyl methacrylate monomer vapors on (Blanchet et al), 344
Rest, broken occlusal, replacement technique for (Kazanoglu and Smith), 621

Rest—cont'd
position, mandibular, in subjects with diverse dentofacial morphology, evaluation of (Wessberg et al), 451
seats, prefabricated lingual, for removable partial dentures, evaluation of (Wong et al), 521
Restoration(s), cast, evaluation of frozen-slab technique for cementing (Palermo et al), 555
full cast, design offering superior marginal characteristics (Pardo), 539
crown, and gingival inflammation in controlled population (Koth), 681
heat-processed acrylic resin provisional: In-office procedure (Davidoff), 673
of tooth to accommodate preexisting cast crown (Brady), 268
small cast-gold, use of radiographs in (Mattingly et al), 44
Restorative dentistry and periodontics, principles in: Forced eruption (Potashnick and Rosenberg), 141
-endodontic diagnostic concept: Stressed pulp condition (Abou-Rass), 264
resin foundation material (Brady and Reisbick), 676
Retainer design, effect of, on retention of filled resin in acid-etched fixed partial dentures (Williams et al), 417
Retention, crown, effects of cement on (Worley et al), 289
of castings with glass ionomer cement (McComb), 285
dowels using composite resin as cementing medium (Assif and Ferber), 292
filled resin in acid-etched fixed partial dentures, effect of retainer design on (Williams et al), 417
Retruded contact position, hinge axis translation from, to intercuspal position in dentulous subjects in treatment (Rosner), 713
Rotational axes of semiprecision and precision distal-extension removable partial dentures, analysis of (McLeod), 130
path removable partial denture design (Jacobson and Krol), 370
Rubber dam, utilizing, in making impressions (Stankewitz and Striano) (Tips), 358
silicone, prosthetic materials fabricated using conventional processing techniques, surface topography of (Kent and Zeigel), 698

S

School, dental, curriculum, maxillofacial prosthetics in (Firtell and Curtis), 336
Seating castings, technique for (Arakelian) (Tips), 357
Seats, prefabricated lingual rest, for removable partial dentures, evaluation of (Wong et al), 521
Semiadjustable articulator, modification of, to accept patient's intercondylar width (Kafandaris and Theodorou), 385
Semiprecision and precision distal-extension removable partial dentures, analysis of rotational axes of (McLeod), 130
attachment, Micro-Ring, for mandibular staple bone implant prostheses (Tarlow and Rissin), 695
Sequelae, overdenture: Nine-month report (Renner et al), 377
Shrinkage, polymerization, of composite resins, clinical significance of (Bausch et al), 59
Silicone rubber prosthetic materials fabricated using conventional processing techniques, surface topography of (Kent and Zeigel), 698
Single-unit surface electrode pair for use in electromyography (Yamaga et al) (Tips), 626
Slab, frozen-, technique, evaluation of, for cementing cast restorations (Palermo et al), 555
Soft denture liners, creep and stress relaxation of (Robinson and McCabe), 135
palate desensitization procedure for patients requiring palatal lift prostheses (Daniel), 565
tissue deformities, postsurgical, associated with marginal mandibulectomy, prosthodontic management of. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
Soldering, post-ceramic, of various alloys (Sloan et al), 686
Speech with complete dentures, functional contouring of palatal vault for improving (Goyal and Greenstein), 640
Splint(s), occlusion, in treatment of acute and chronic patients with craniomandibular disorders, study of use of (Okeson et al), 708
technique, parallel tube provisional (Lenchner), 412
Stabilization prosthesis, mandibular (Hartman and Swepston), 215
Stannous flouride gel, 0.4%, effect of, on gingival health of overdenture abutments (Derkson and MacEntee), 23
Staple bone implant prostheses, mandibular, Micro-Ring semiprecision attachment for (Tarlow and Rissin), 695
mandibular orthopedic bone, in treatment of atrophic mandible (O'Malley and Gordon), 432
Strength, apparent bond, of porcelain-metal couples, effect of cooling rate on (Guinn et al), 551
bond, of ceramometal systems, approach to determining (Schaffer), 282
two ceramometal systems, comparison of (Gavelis et al), 424
of aluminous porcelain jacket crowns constructed with conventional and twin foil technique, comparative study of (Munoz et al), 271
studies, tensile bond, Part I: Optimal concentration of phosphoric acid as etching agent (Gottlieb et al), 48
thickness, and plastic deformation of occlusal registration strips (Halperin et al), 575
Stress analysis, photoelastic, of cast-gold endodontic posts (Mattison), 407
relaxation and creep of soft denture liners (Robinson and McCabe), 135
Stressed pulp condition: Endodontic-restorative diagnostic concept (Abou-Rass), 264
Strips, occlusal registration, thickness, strength, and plastic deformation of (Halperin et al), 575
Students, dental, survey of removable prosthodontic clinical experience of (Herring and Stephens), 198
Subperiosteal implant(s), unilateral: Clinical technique evolving from experimental studies (Flynn et al), 82
in primates (Natiella et al), 68
Subpontic clasping system, updated laboratory procedure for (Garver), 734
Surface electrode pair, single-unit, for use in electromyography (Yamaga et al) (Tips), 626
of porcelain-bonded-to-metal crowns, evaluation of adjustment and postadjustment finishing techniques on (Newitter et al), 388
topography of enamel margins of butt and beveled Class V preparations (Retief et al), 166
silicone rubber prosthetic materials fabricated using conventional processing techniques (Kent and Zeigel), 698
Surgical flaps, Part II: Prosthodontic management of postsurgical soft tissue deformities associated with marginal mandibulectomy (Shifman and Lepley), 303
Swallowing and chewing, positions of mandible during, recorded by light-emitting diodes (Jemt), 206

T

Tarnish and corrosion of noble metal alloys (Lang et al), 245
Teaching removable partial denture design, instructional aid for (Williams and Hartman) (Tips), 222
Temperature, increased mold, study of effect of, on casting ability of some nonprecious alloys for porcelain veneers (Thomson), 52
Tensile bond strength studies, Part I: Optimal concentration of phosphoric acid as etching agent (Gottlieb et al), 48
Terminology, update on: Dental casting alloys (Goldfogel and Nielsen), 340
Thickness(es), optimum, of opaque and body porcelain (Barghi and Lorenzana), 429

Thickness(es)—cont'd
strength, and plastic deformation of occlusal registration strips (Halperin et al), 575
Tilted posterior tooth. Part II: Biomechanical therapy (Becker et al), 149
Tissue deformities, postsurgical soft, associated with marginal mandibulectomy, prosthodontic management of. Part I: Loss of vestibule (Shifman and Lepley), 178; Part II: Surgical flaps (Shifman and Lepley), 303
massage, beneficial effects of, for edentulous patient (Tautin), 653
TMJ diagnosis, pitfalls of muscle palpation in (Friedman and Weisberg), 331
structure of, as viewed on pantomograph (Chomenko), 332
Tooth (teeth), aid to reducing, selectively (Mullick) (Tips), 494
clenching, experimental, delayed onset of masseter muscle pain in (Christensen et al), 579
contact, nonworking, influence of assisted mandibular movement on incidence of (Okeson et al), 174
endodontically treated posterior, post-core foundations for (Chan and Bryant), 401
furcally involved, preparation of (Ward), 261
maxillary anterior, and maxillary central incisor, clinical evaluation of techniques to determine combined width of (Scandrett et al), 15
multirooted, cast-gold core and post construction for (Kitzis and Pascoe), 156
orthodontically banded, method to facilitate impressions of (Lorton) (Tips), 356
restoration of, to accommodate preexisting cast crown (Brady), 268
tilted posterior. Part II: Biomechanical therapy (Becker et al), 149
Topography, surface, of enamel margins of butt and beveled Class V preparations (Retief et al), 166
silicone rubber prosthetic materials fabricated using conventional processing techniques (Kent and Zeigel), 698
Tracings, pantographic, of mandibular border movements, factors influencing (Mongini and Capurso), 585
Translation, hinge axis, from retruded contact position to intercuspal position in dentulous subjects in treatment (Rosner), 713
Tray, custom impression, use of polydimethylsiloxane as (Taicher et al), 562
Treatment, dental, and etiology of severe involuntary orofacial-cervical movement disorders (Sutcher and Sugar), 703
Treatment—cont'd
of acute and chronic patients with craniomandibular disorders, study of use of occlusion splints in (Okeson et al), 708
Trimming, die: Guide to physiologic contour (Tanquist), 485
Tristimulus values, CIE, conversion of Chromascan designations to (Bangtson and Goodkind), 610
Tube, parallel, provisional splint technique (Lenchner), 412
Twin foil and conventional technique, comparative study of strength of aluminous porcelain jacket crowns constructed with (Munoz et al), 271

U

Undercuts, anatomic, hollow polydimethylsiloxane facial prostheses using (Taicher et al), 444
Unilateral subperiosteal implant(s): Clinical technique evolving from experimental studies (Flynn et al), 82
in primates (Natiella et al), 68

V

Vapors, methyl methacrylate monomer, effects of, on respiration and circulation in unanesthetized rats (Blanchet et al), 344
Vault, palatal, functional contouring of, for improving speech with complete dentures (Goyal and Greenstein), 640
Veneers, porcelain, study of effect of increased mold temperature on casting ability of some nonprecious alloys for (Thomson), 52
Vertical dimension of occlusion, interocclusal registration at, using acrylic resin copings (Postol), 39
Vestibule, loss of, Part I: Prosthodontic management of postsurgical soft tissue deformities associated with marginal mandibulectomy (Shifman and Lepley), 178
Vestibuloplasty, edentulous, using palatal graft technique (Amphlett and Colwell), 8

W

Waxing instrument, improved electric, use of (Lundeen and Welsch), 352
Width, combined, of maxillary anterior teeth and maxillary central incisor, clinical evaluation of techniques to determine (Scandrett et al), 15
patient's intercondylar, modification of semiadjustable articulator to accept (Kafandaris and Theodorou), 385

X

Xylene—Potential danger to maxillofacial prosthodontist (Glassman), 571
